Sources: U.S. Department of Education, Office of Special Education Programs, Data Analysis System (DANS), "Report of infants and toddlers receiving early intervention services in accordance with Part C," 2004. Data updated as of July 30, 2005.

U.S. Bureau of the Census. For the 50 states and D.C., population data retrieved August 2005 from http://www.census.gov/popest/states/files/SC-EST2004-AGESEX_RES.CSV. For American Samoa, Guam, and Northern Marianas, population data are from Census 2000, Summary File 1, Table P7. For Puerto Rico they are from Census 2000, Summary File 1, Table P14. For Virgin Islands, they are from Census 2000, Summary File 1, Table P9. Retrieved August 2004 from http://factfinder.census.gov/servlet/DatasetMainPageServlet?_program=DEC&lang=en.

. Data not available.

x Data suppressed.

N = Number of infants under 1 year of age receiving early intervention services.

% = Percent of population receiving early intervention. This is equal to the total number of infants under 1 year of age receiving early intervention services divided by population under 1 year of age multiplied by 100.

^aDIF = Difference from national baseline. This column shows the difference between the percentage of the infant under 1 year of age served in the state and the percentage served in the nation as a whole. A positive DIF value indicates that the state serves a higher percentage of its infant population than is true for the nation as a whole. Because criteria for Part C eligibility vary widely across states, differences in identification rates on this table should be interpreted with caution. See Part C Child Count Data Notes for an explanation of individual state differences on how data are reported.

^bPercent change = 2004 percentage minus 2000 percentage divided by 2000 percentage multiplied by 100.
