PERCENTAGE OF POPULATION = BIRTH THROUGH 2 TOTAL + POPULATION 0-2.

DIF = Difference from National Baseline.

% Change = ((2003 percentage - 1999 percentage) / 1999 percentage) * 100.

For Virginia, 933 children were added for 1999, 971 children were added for 2000, 971 children were added for 2001, 984 children were added for 2002, and 1024 children were added for 2003. to adjust for children under the age of 3 who were served under IDEA, Part B.

¹Population for American Samoa, Guam, Northern Marianas, Puerto Rico, and Virgin Islands are from the 2000 Census. ²2002 population estimates were used.

The population estimates used for 1999 are intercensal estimates based on the 1990 and 2000 Censuses. For 2000 through 2003, population data are July 1 estimates, released October 2004. These data are based on the 2000 decennial census. The population estimates are from the Population Estimates Program, U.S. Census Bureau, Population Division.

Because criteria for Part C eligibility varies widely across states, differences in identification rates on this table should be interpreted with caution

Please see Data Notes for an explanation of individual state differences on how data are reported (<http://www.IDEAdata.org/docs/cdatanotes2003.pdf>).

Data based on the December 1, 2003 count, updated as of July 31, 2004.

U.S. Department of Education, Office of Special Education Programs, Data Analysis System (DANS).
